

Front-End Software Engineer

I'm Logan Wilson

Chicago, IL

(847) 826-1057

LOGAN.W.DEV@GMAIL.COM

Front-End Software Engineer looking to join a great team and help build the next generation of web solutions used by our product owners and customers globally. My work is not tied to tech trends.. I am a problem solver and entrepreneur. My unique value comes from my ability to handle ambiguity. I am business minded. - cognisant of how my actions, attitude & quality of work can and will affect the big picture of the business.

I build applications quickly but thoughtfully, balancing speed to market with longevity and scalability, and extraordinary customer experience.

Responsibilities

- Build awesome web experiences using React.js
- Plan and accommodate all mediums, screen sizes and device types
- Build in flexibility and customization from the start
- Adapt to changing business conditions and priorities
- Partner with product managers, content producers, QA engineers and release engineers as your application moves from development to production

Skills

- 8+ years with Adobe Design Tools (Print, Web, Packaging-design)
- Proficiency in HTML, CSS, JavaScript, Email-Automation, Social Media Management , Microsoft Office, Sketch or any sufficient alternative.
- Comfortable adapting to different work environments & management styles. Such as - Agile, SCRUM, etc..

- Self-taught programmer through many online certifications, medium articles & a course at Depaul University.
(Data-Visualisation with Javascript)
- Solid understanding of fundamental web technologies such as HTTP, REST,SSH, AJAX and JSON.
- Strong proficiency in JavaScript / ES6, including DOM manipulation & the JavaScript object model
- Understanding of React.js and its core principles
- Experience with Redux
- Experience with common Front-end development tools such as Babel, Webpack, NPM, etc.
- Experience working with RESTful APIs
- Experience with Node.js and Express
- Excellent mastery of web standards, cross-browser compatibility, accessibility and SEO.
- Strong CSS skills w/ experience building responsive applications across a variety of browsers & devices using modern CSS3 techniques
- Solid knowledge of maintaining and debugging live software systems
